

Examination 2 - Math 141, Frank Thorne (thornef@mailbox.sc.edu)

Wednesday, October 31, 2011

There will be seven questions, all of them taken from the homework assignments. The last two will definitely appear, and five of the first ten will appear, chosen at random.

As before, the “additional” problems on the homeworks are fair game.

- (1) One problem from (a)-(d), (i) or Section 3.3 on Homework 5, selected at random.
- (2) One problem from (j) or Section 3.4 on Homework 5, selected at random.
- (3) One problem from (l), (m), (o), or Section 3.5 on Homework 5, selected at random.
- (4) One problem from (a)-(d) or Section 3.6 on Homework 6, selected at random.
- (5) One problem from Section 3.7 on Homework 6, selected at random.
- (6) Problem (i), (j), or (k) on Homework 6, selected at random.
- (7) One problem from Section 3.8 on Homework 6, selected at random.
- (8) One problem from Section 3.9 on Homework 7, selected at random.
- (9) One problem from (b)-(e) or Section 4.1 on Homework 7, selected at random.
- (10) One problem from Chapter 4.3 on Homework 8, selected at random.
- (11) One problem from Chapter 3 Review on Homework 7 (additional), selected at random.
- (12) One problem from Chapter 4.5 or (f)-(j) on Homework 8, selected at random.
